

We are a rapidly growing research-led company with offices in Europe, America & Asia, servicing over 500 clients.

Research is at the core of the company, with an experienced team that has been active in multiple academic and practitioner communities: Information Retrieval, Natural Language Processing and Machine Learning.

Signal AI has built a decision augmentation platform

- Processing, analysing, and indexing the world's news, broadcasts and regulations - over 4 million documents every day.
- Helping professionals to be informed and make better decisions.
- Reputation management, strategic PR and communication, ESG performance, regulations and compliance, supply chain risk.
- Applying cutting-edge research that will affect people's lives.

What we offer

- We host visiting researchers and paid PhD student interns from top universities and research labs around the world.
- Based in our London HQ.
- You will be part of an applied research team, working closely with research scientists, data engineers, and product designers.
- You will have access to large data repositories of news media content and labelled data.
- Possibility to publish work in top conferences.
